

Nexus Testing Guide

Easy, step-by-step. No computer skills needed — just click and tell us if it works.

How to use this guide

- Do the missions **in order**, top to bottom.
- Each step has **DO THIS** (what to click) and **YOU SHOULD SEE** (what should happen).
- After each step, check one box: **Worked** if it did what the guide says, **Broke** if it did something different, looked weird, or showed an error.
- If you check **Broke**, write what happened and what page you were on. A screenshot helps a lot!
- Confused even though it "worked"? Write that down too — confusing is a problem we want to fix.

Before you start

- Open this website in Chrome: <https://gateguard-portal-git-beta-gate-guard.vercel.app/>
- Log in with the test account you were given.
- If a page is blank or spins for more than 30 seconds, that's a **Broke** — write it down.

Words you'll see:

Opportunity / Deal = a possible sale.

Work Order / Job = a technician visit.

Quote = a price sheet for a customer.

Site / Location = a property (like an apartment building).

Mission 1 — Add a product and turn on its "AI brain"

Go to: **Operations** (bottom of screen) → **Parts** tab

1.1 DO THIS: Click "+ Add product." Type a name like `Test Camera 123`. In the **Manual PDF URL** box paste `https://www.w3.org/WAI/ER/tests/xhtml/testfiles/resources/pdf/dummy.pdf` then click **Add to catalog**.

YOU SHOULD SEE: a green message that it was added (it mentions reading the manual).

☐ **Worked** ☐ **Broke**

Notes:

1.2 DO THIS: In the search box, type `Test Camera`.

YOU SHOULD SEE: your product card appears.

☐ **Worked** ☐ **Broke**

Notes:

1.3 DO THIS: On the product card click "**Vectorize manual now.**" Wait 1 minute, reload the page, find the product again.

YOU SHOULD SEE: the button shows it's working, and after reload a green "**AI ready**" badge appears.

☐ **Worked** ☐ **Broke**

Notes:

1.4 DO THIS: At the top, in the "**Find it for me**" box, type `LiftMaster CSL24UL` and click **Look it up**.

YOU SHOULD SEE: a green "Found: ..." message, and the add-product form fills in by itself.

☐ **Worked** ☐ **Broke**

Notes:

Mission 2 — The price calculator

Go to: **Sales** → open any deal → **Financials** step

2.1 DO THIS: Type `100` in "Total living units" and `2` in "Gates / common doors."

YOU SHOULD SEE: dollar amounts appear and update within a second (like "Gate Guard Fee" and "Suggested retail").

☐ **Worked** ☐ **Broke**

Notes:

2.2 DO THIS: Change units to a bigger number like `500`.

YOU SHOULD SEE: the dollar amounts get bigger — not stuck, not blank, not "NaN".

☐ **Worked** ☐ **Broke**

Notes:

Mission 3 — The sales board (where deals live)

Go to: **Sales** (a row of buckets/columns)

3.1 DO THIS: Read the column titles across the top.

YOU SHOULD SEE these 7 in order: **Meet & Present**, **Site Survey**, **Proposal**, **Negotiate**, **Contract & Sign**, **Deposit**, **Closed Won** (maybe a "Lost" too).

☐ **Worked** ☐ **Broke**

Notes:

3.2 DO THIS (important!): Open a deal. Click **Next** a few times until you reach the **Payment** step. Close it and return to the **Sales** board.

YOU SHOULD SEE: the same deal is STILL on the board (now in **Deposit** or **Contract & Sign**). It must NOT disappear.

☐ **Worked** ☐ **Broke**

Notes:

Mission 4 — Build a quote (price sheet)

Go to: **Sales** → open a deal → **Proposal** step

4.1 DO THIS: Under "Add products," type `camera` and click one that appears.

YOU SHOULD SEE: it's added to a list with a price.

☐ **Worked** ☐ **Broke**

Notes:

4.2 DO THIS: Under "type a custom line," enter `Install labor`, qty `1`, price `500`, click **Add line**.

YOU SHOULD SEE: it's added and the totals at the bottom go up.

☐ **Worked** ☐ **Broke**

Notes:

4.3 DO THIS: Click **Create quote**.

YOU SHOULD SEE: a summary with a quote number like **GG-2026-0001** and two buttons (Open/edit, Client proposal view).

☐ **Worked** ☐ **Broke**

Notes:

4.4 DO THIS: Leave the Proposal step, then come back to it on the **same deal**.

YOU SHOULD SEE: it shows the quote you just made (summary), NOT a blank builder. It should not make a second quote by itself.

☐ **Worked** ☐ **Broke**

Notes:

Mission 5 — Win the deal and make a job

Go to: same deal → **Payment** step (the last one)

5.1 DO THIS: Look at the "**Convert to install job**" button before checking anything.

YOU SHOULD SEE: it's grey/unclickable until you check BOTH boxes ("Contract is signed" and "Deposit payment received").

☐ **Worked** ☐ **Broke**

Notes:

5.2 DO THIS: Check both boxes, then click "**Deposit collected — convert to install job.**"

YOU SHOULD SEE: a green success message that the deal is closed and a job was created.

☐ **Worked** ☐ **Broke**

Notes:

5.3 DO THIS: Go to **Operations** → **Work Orders**.

YOU SHOULD SEE: a new job with the customer's name and "Install" in the title.

☐ **Worked** ☐ **Broke**

Notes:

Mission 6 — The activity feed (story of a deal)

Go to: open the same deal → scroll to the **bottom**

6.1 DO THIS: Look at the "**Deal activity**" box at the bottom.

YOU SHOULD SEE: a list with icons and times — it should include the **quote** you made and the **work order** you made, newest on top.

☐ **Worked** ☐ **Broke**

Notes:

Mission 7 — A location's status

Go to: **Operations** → **Locations** → click any location

7.1 DO THIS: Look near the top of the location panel.

YOU SHOULD SEE: a small colored label like **Prospect**, **Onboarding**, or **Active**. If not active, it should say what's missing (e.g. "To activate: Contract not signed · Deposit not collected").

☐ **Worked** ☐ **Broke**

Notes:

7.2 DO THIS: Scroll to the bottom of the location panel.

YOU SHOULD SEE: a **"Site activity"** list. (It may be empty for a new location — that's okay, it should say something friendly, not an error.)

☐ **Worked** ☐ **Broke**

Notes:

Mission 8 — Phone check (do this on your phone!)

Open the same website on your phone and log in

8.1 DO THIS: Tap around the bottom buttons and open a few pages.

YOU SHOULD SEE: everything fits the screen — no text cut off the edges, no buttons hiding behind each other, no need to scroll sideways.

☐ **Worked** ☐ **Broke**

Notes:

When you're done

How many **Broke** did you find? Which mission numbers?

Anything confusing, even if it "worked"?

Send this sheet (with your notes) and any screenshots back to the team. Thank you — every problem you catch helps!
